DIVORCE GIVEN U. S. DUCHESS

(By Associated Press)
LONDON, Nov. 9.—The duchess of Marlborough, formerly Consuelo Vanderbilt, was granted a divorce today. A denial of the allegations of desertion and misconduct was made by the duke, but no testimony was taken.
The charge of desertion was based on the duke's disobedience to an order of restitution of conjugal rights which the duchess obtained in March. A detective testified he shadowed the duke and a woman from London to Paris. Evidence was given that the duke occupied a room at a Paris hotel with a young woman. The divorce will become absolute in six months unless the duke resists it.
The couple were married in 1895 and separated in 1902. There are two adult children. The duke attended court but the duchess pleaded illness and was absent.

CACTUS NEVADA MAKES SHIPMENT

The operations in the Cactus district are crowded with considerable interest of late. Various properties are carrying on their plans of development, creating large ore reserves for future reduction in milling plants.
The recent shipment of ore to the Goldfield mill by the Cactus Nevada Silver Mines company returned \$32.40 per ton. This was a good average of the general character of ore found in the various properties in the district. Nearly all the ore of the district are composed of the same mineral structure and value, and the lead taken by the Cactus Silver company well establishes a basis by which other properties can govern themselves. It has been estimated by good authority that the mining and milling cost of Cactus ores will be about \$6 per ton, so that a volume of ore averaging as low as \$10 per ton would return a handsome profit. With the recent shipment by the Cactus Silver company of \$32.40 per ton, ore establishes a wide margin of profit and indicates the stability of the district.

NIGHT SCHOOL MAY BE STARTED

A number of young people have been making inquiries concerning the possibilities of having a night school established in Tonopah. Superintendent Dilworth has taken the matter up with the state superintendent and finds that there are still funds available from state and county funds for the support of such schools. Before such a school can be established it is necessary that there be at least 15 applicants for the work.
As a part of the work offered in such a school the state superintendent and also the federal naturalization agents for this territory agree that courses in Americanization be given for the benefit of aliens who desire to prepare themselves for the duties of citizenship.
It may be wise for those who would like the opportunity this winter to devote some of their evenings to useful study to make their wants known to Superintendent Dilworth, who will then be in a position to take the matter up with the school board and the state authorities.
